PROFESSIONAL SUMMARY

Focused on **applied AI software engineering and agentic development**. Core stack: **Python, TypeScript, Vue, Supabase** and **LLM APIs**. Solo developer of **ProString**, a production multi-tenant SaaS built with a custom **agent harness**. Pursuing a **Specialization in AI and Big Data**; 4th place at the national ProgramaMe finals.

WORK EXPERIENCE

Applied AI Junior Developer | ProString
Remote | May 2026 - Present | prostringmanage.com

- Built a **multi-tenant SaaS** (Vue 3, TypeScript, Supabase) with tournament/shop modes and Stripe billing.
- Built a custom **agent harness**: subagents, skills, **7 MCP servers** (least-privilege); 1,500+ tests, 8 **CI/CD** workflows.
- Secured it with **180+ RLS policies**, RBAC (130+ permissions) and **database-enforced TOTP MFA**.
- Shipped **23 Edge Functions**, **80+ RPCs**, pg_cron data pipelines and **immutable, consecutively numbered invoices**.
- **Optimized UX** for live-tournament order entry: **auto-jump between fields**, **one-click ticket printing**, real-time sync.
- Drive the roadmap with **LLM-assisted competitor analysis** (gaps, next steps) plus my own ideas; in progress: **RAG assistant**, LLM-assisted import and analytics, **Python pipelines** aggregating public tennis data.

Junior Python Developer | Confidential | AI News SaaS
Remote | Feb 2026 - Mar 2026

- Improved a news-linking algorithm (accuracy, fewer matching errors) in a Python SaaS on Google Cloud.
- Moved file processing from frontend to backend in GCP, reducing timeout/CORS failures.

Junior Android Developer | Eulix
Barcelona | Oct 2024 - Apr 2025

- Built a chatbot (virtual assistant) for onboarding and improved the UI across all screens.
- Integrated a REST API with Retrofit, working with an international back-end team in India.

PROJECTS

Facts: News AI Summary
Dec 2024 - Present (paused) | getfacts.app

- **Python ETL pipeline**: scraping 10+ RSS outlets, **embeddings, clustering**, **LLM summaries**.

EDUCATION

Specialization, Artificial Intelligence and Big Data | Linkia FP
Feb 2026 - Dec 2026 (expected) | GPA: 9

- Focus: **AI engineering and agentic development** on top of ML and big data foundations.
- Hands-on: CNNs (Keras, PyTorch), house-price models served via Flask API; capstone in progress (regression and clustering).

Higher Vocational Degree, Multiplatform Software Development (DAM) | Institut Tecnològic de Barcelona
Sep 2023 - May 2025 | GPA: 9.08/10

- **4th place** at the national ProgramaMe competitive programming finals (Madrid), team of 3, 2024 and 2025.

SKILLS

Languages: Python, TypeScript, Java, Kotlin, SQL, PL/pgSQL

Back-end & Cloud: Supabase (PostgreSQL, Row-Level Security, Realtime, Edge Functions), GCP, Docker, Docker Compose, FastAPI, pg_cron, Deno, Node.js, RESTful APIs, Serverless, Firebase, MongoDB, Stripe

AI & Data: Generative AI, LLM APIs (OpenAI, Gemini, OpenRouter), RAG, LangGraph, Prompt engineering, Embeddings, Sentence-BERT (sentence-transformers), Hugging Face Transformers, NLP, K-means clustering, MCP (Model Context Protocol), AI-assisted development, Claude Code, ETL, Scraping, Pandas, NumPy, Scikit-learn

Front-end & Mobile: Vue 3, Pinia, Vite, React, Next.js, TailwindCSS, ECharts, Zod; Android (Compose, Room, Hilt)

DevOps & Testing: CI/CD, GitHub Actions, Git, pytest, Vitest, Playwright; Agile, Scrum, Clean Architecture, SOLID

Learning: LLM evaluation, OCR, YOLO, PySpark, TensorFlow, Keras, Kafka, Hadoop, Databricks, Polars, Power BI, R

LANGUAGES

Spanish (Native), Catalan (Native), English (C1), German (A1)
